

Interactive Conference and Education Display

This multi-purpose conference and educational machine features a 4K UHD display with a resolution of 3840x2160, providing crisp and clear visuals. It offers interactive whiteboard functionality for collaborative work, supports multi-party video conferencing, and enables wireless screen sharing.

Overview

Interactive Conference and Education Solution

Designed for modern collaborative environments, this interactive display offers a seamless 4K UHD experience for both conference rooms and educational settings. With support for up to 32-point touch interaction, it facilitates dynamic presentations, multi-party video conferencing, and intuitive whiteboard functionality. The system is built for versatility, featuring wireless screen sharing capabilities and an optional Windows OPS module to suit diverse professional and academic workflows.
