

Interactive Educational Reading Pen with Bunny Design

This interactive reading pen is designed for children's education. The pen, shaped like a bunny, supports engaging learning activities.

Product Overview

Interactive Learning Companion

This interactive reading pen represents a new generation of intelligent educational tools, combining advanced optical image recognition with digital voice technology. Designed with a friendly bunny aesthetic, it bridges the gap between electronic entertainment and structured education. The device supports versatile learning modes including point reading, repeat reading, follow-along practice, and recording, making it a comprehensive tool for early childhood development.

Key Features
