

Interactive Flat Panel Display

Interactive flat panel displays combine the functions of a projector, whiteboard, and computer. These displays feature high-resolution screens with multi-touch capabilities for annotation, collaboration, and content sharing.

Overview

Interactive Flat Panel Overview

This interactive flat panel display combines the functionality of a traditional whiteboard with the advanced capabilities of a modern computer. Designed for educational and business settings, it features a high-resolution screen with multi-touch capabilities for intuitive interaction using fingers or styluses. The unit supports seamless collaboration through wireless screen mirroring, built-in annotation software, and video conferencing integration.
