Product Overview

Interactive Smart Whiteboard Display

This advanced interactive display combines the functionality of a traditional whiteboard with modern smart technology to enhance collaborative learning and professional presentations. It features high-definition visuals, multi-touch capabilities, and seamless wireless screen projection, making it an ideal solution for classrooms, remote offices, and conference rooms. The system supports a wide range of interactive tools, including file annotation, video conferencing, and extensive online teaching resources.

Interactive Features

User-friendly interface supporting easy writing, hand-drawing, and file annotation for Word, Excel, and PPT.

Supports high-speed ten-point infrared touch and real-time remote communication with various video terminals.

Core Capabilities

- Intelligent annotation and erasing
- Wireless screen projection
- Two-way operation
- Multimedia teaching
- Video conferencing support

Touch Technology

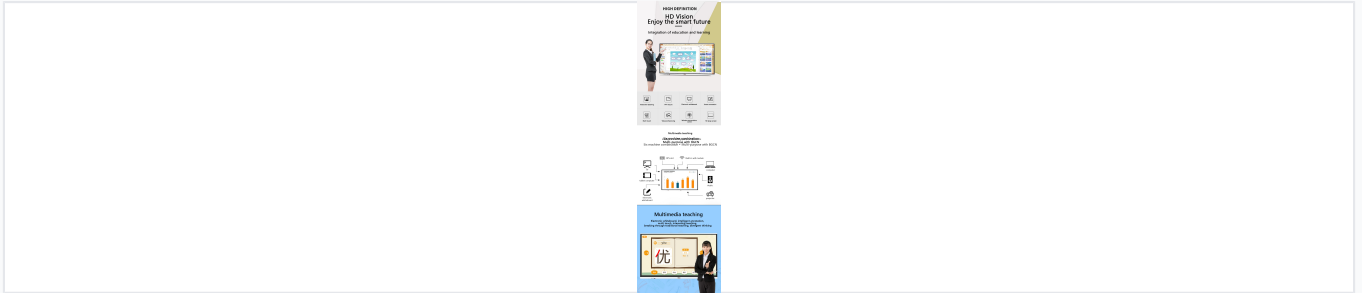

10-Point Infrared Touch, Multi-Gesture Support, High Sensitivity, Fast Response

Compatibility & Software

Supported Document Formats

File Type	Functionality
Word	Annotation & Erasure
Excel	Annotation & Erasure
PPT	Annotation & Erasure
PDF	Annotation & Erasure

Hardware & Connectivity

Features include built-in Wi-Fi, OPS slot, and seamless integration with tablets, computers, and projectors.

Hardware Features

- Built-in Wi-Fi module
- OPS slot available
- High-definition display
