Overview

Smart Teaching Solution

This multimedia interactive integrated machine serves as a comprehensive teaching demonstration and operation platform. It seamlessly combines high-definition display, interactive electronic whiteboard capabilities, computer functionality, and network transmission into a single, ingenious design. Ideal for modern classrooms, it provides an excellent interactive teaching experience with large-screen display technology.

Key Features

Core Functionalities	Multi-touch, Wireless screen transmission, Smart split screen, Remote video support, Six-in-one integration

Writing & Interaction

Writing Experience

- High-sensitivity writing software
- Paper-like writing feel
- Humanized touch gesture design
- Movement, shrinkage, and eraser functions
- Key-point annotation
- One-key saving of class records
