

Interconnected Link Iron Chain

This iron chain is constructed from interconnected links. It is designed for load-bearing and securing applications in construction, rigging, and towing.

Product Overview

Heavy-Duty Interconnected Iron Chain

This heavy-duty iron chain is constructed from robust, interconnected links designed to provide exceptional strength and durability. Engineered for demanding environments, it is suitable for a wide range of load-bearing and securing applications. Whether used in construction, rigging, towing, or general-purpose fastening, this chain offers the reliability required by professional buyers.

Technical Specifications

Material	Iron
Finish	Metallic

Applications

Primary Applications	Construction, Rigging, Towing, Fastening
