

Interconnected Residential Smoke Detector

These interconnected smoke detectors are designed for residential safety. When one detector senses smoke, all connected units activate, providing comprehensive alert coverage throughout the home.

Product Overview

Smart Residential Safety

This interconnected smoke detector is engineered for comprehensive residential safety. Utilizing advanced interconnected technology, the system ensures that when one unit detects smoke, all linked detectors activate simultaneously to provide a unified alert throughout the home. Designed for reliability and ease of use, this solution offers a robust layer of protection for any living environment.

Technical Specifications

Key Features

- Interconnected alarm system
- Residential safety design
- Easy installation
- Low maintenance requirements
- Test and Learn functionality

Model Number	KD-101LC
Interconnected Technology	Yes
Safety Compliance	Residential Grade
