

Interconnected Wireless Smoke Detector with Hush Button

This interconnected wireless smoke detector links multiple units for comprehensive fire safety. It features a test button and a hush button, simplifying installation and ensuring early warnings.

Product Overview

Comprehensive Fire Safety Solution

The Interconnected Wireless Smoke Detector is designed to provide comprehensive fire safety by linking multiple units together. When one detector senses smoke, all interconnected units sound an alarm simultaneously, ensuring occupants throughout the building are alerted promptly. This wireless system simplifies installation by eliminating the need for complex wiring, making it suitable for both residential and commercial applications.

Key Features

Model Number	KD-101LB
Core Functionalities	Interconnected, Wireless, Hush Button, Test Button, Low Battery Warning
Installation	Wireless (No complex wiring required)

Operational Details

Maintenance Features

- Test button for functionality verification
- Hush button to silence nuisance alarms
- Low battery alert system

Suitable Applications

Residential • Commercial

Power Source	Long-lasting batteries
