Product Overview

Professional Grade Modular Flooring

These multi-function modular gratings are engineered for high-performance environments such as car wash shops, auto repair centers, and industrial workshops. Featuring a durable interlocking design, they offer superior water drainage, non-slip safety, and high load-bearing capacity. Built from 100% new, UV-stabilized materials, these tiles provide a chemical and stain-resistant solution that is easy to install without special tools or adhesives.

Performance Metrics

Bearing Capacity

20 tons

Max Load

Material Characteristics

100% New Material, UV Stabilized, Chemical Resistant, Stain Resistant, Waterproof, Fireproof, Non-Toxic
