

Interlocking Perforated Rubber Mat for Industrial Use

This heavy-duty rubber mat features an interlocking design for customizable configurations. The perforated surface ensures efficient fluid runoff and provides slip resistance, enhancing safety in demanding environments.

Product Overview

Industrial-Grade Safety Flooring

This heavy-duty interlocking rubber mat is engineered specifically for demanding industrial and commercial environments. Its perforated surface design ensures efficient fluid runoff and superior slip resistance, making it an ideal choice for wet workstations and assembly lines. The modular interlocking system allows for seamless expansion and customization to fit any workspace layout, while the durable rubber compound provides long-lasting anti-fatigue benefits for workers.

Key Features

Material Resistance

Oil Resistant • Chemical Resistant • Grease Resistant

Safety and Performance

Anti-Fatigue, Slip Resistant, Drainage Optimized, Modular Design

Specifications

Recommended Environments

- Wet environments
- Industrial workstations
- Assembly lines
- Commercial facilities

Material Composition

Durable industrial rubber compound

Maintenance

Easy to clean and maintain
