Product Overview

Durable Interlocking Flooring Solution

These interlocking tiles are designed to provide a robust, non-slip surface suitable for both grilling areas and general outdoor decking. Featuring a perforated, grid-like pattern, the tiles ensure efficient water drainage and airflow, preventing moisture buildup and extending the lifespan of the underlying surface. Their simple interlocking mechanism allows for quick, tool-free installation, making them an ideal low-maintenance solution for patios, balconies, and decks.

Physical Dimensions

Dimensions

500 mm
Length

500 mm
Width

50 mm
