

Internal Casing and Tubing Salvage Hook

This hook is designed for internal salvage of casing or tubing, accommodating various rope types and debris. It comes in two structural forms: dead hook and live hook.

Product Overview

Industrial Salvage Hook Solutions

The Internal Casing and Tubing Salvage Hook is engineered for high-performance retrieval and salvage operations within industrial environments. It provides a secure mechanism for extracting rope, wire, cable, and wax build-ups from tubing systems. Available in both dead and live hook structural configurations to suit specific operational requirements.

Technical Specifications

Typical Applications

- Casing salvage
- Tubing salvage
- Wire rope removal
- Cable retrieval
- Logging wire extraction
- Wax scraping

Structural Configurations

Dead Hook, Live Hook

Design and Build

Design Features

High-strength material • Wear-resistant • Forked lower section • Integrated pins
