

Internal Computer Connection Cable

These electrical cables are designed for internal computer connections and other electronic devices. The cables come in assorted colors and may be single-conductor or multi-conductor.

Product Overview

Versatile Internal Connectivity

These internal computer connection cables are designed to provide reliable data and power transmission for various electronic components. Featuring a diverse range of insulation colors and conductor configurations, they are suitable for complex internal wiring requirements. This assortment includes both single-conductor and multi-conductor options, ensuring compatibility with a wide array of computer hardware and electronic devices.

Technical Specifications

Conductor Types

- Single-conductor
- Multi-conductor
- Coaxial

Insulation Colors

Blue, Green, Yellow, Red

Application

Primary Applications

Internal Computer Wiring • Electronic Device Assembly • Signal Transmission
