## Product Overview

### Reliable Internal Wiring Solutions

The IW-01 internal wiring harness is designed for seamless integration within electronic devices and household appliances. Engineered for durability and consistent performance, these wires ensure reliable power delivery and signal transmission. With a diverse range of shielding options and core configurations, this solution meets the complex requirements of modern kitchen appliances and electronic manufacturing.

Model Number

IW-01

## Technical Specifications

### Specialized Wire Types

- High-temperature shielded compensation wire

Available Wire Configurations

KC Multi-strand, KC Single-strand, KC Shielded Single-strand, KX Single-strand, NC Single-strand, SC Single-strand, NC Shielded Multi-strand, TX Multi-strand

## Application

### Primary Applications

Electronic Devices • Household Appliances • Kitchen Appliances
