

International Engineering and Equipment Export

Offers comprehensive solutions for international engineering ventures. Specializes in the export of large-scale equipment to support global projects.

Overview

International Engineering & Turnkey Solutions

This service provides comprehensive engineering, procurement, and construction (EPC) solutions for large-scale industrial and energy infrastructure projects globally. Specializing in turnkey coal mine development, power generation facilities, and petrochemical processing plants, the service manages complex projects from initial development to operational handover. With a track record of delivering supercritical power generation equipment and large-scale industrial processing units, this offering supports major energy and resource infrastructure needs.

Key Projects & Capabilities

Notable Achievements

- First modern coal mine and coal-fired power station in Bangladesh
- First overseas turnkey coal mine project by Chinese enterprises
- Largest investment in chemical history for Ca Mau Nitrogenous Fertilizer Plant
- Export of supercritical million-kilowatt power generation equipment

Core Sectors

Coal Mining, Power Generation, Petrochemical, Power Transmission, Fertilizer Production

Technical Metrics

Power Generation Capacity

150 MW

Peaking Power Plant

1 million kW

Coal-Fired Power Plant

Project Delivery Models

Contracting Models

Turnkey • BOT (Build-Operate-Transfer) • EPC
