

# Interphone Pager System with Keypad and Card Reader

This interphone pager system provides secure access and communication. It features a built-in camera, numeric keypad, and card reader, ideal for residential or commercial security.

## Overview

### Professional Interphone Pager System

This modern interphone and pager system is engineered for secure access control and streamlined communication in residential or commercial environments. It integrates a high-visibility digital readout, a tactile numeric keypad, and a built-in card reader for multi-factor authentication. With a durable, weather-resistant housing, the unit provides reliable performance for visitor management and building security.
