

Inverter DC MMA Welding Machine

This compact welding machine offers low energy consumption and stable arc performance. It has self-protection against over voltage and over current.

Overview

Compact Inverter DC MMA Welder

This inverter DC MMA welding machine is engineered for portability and efficiency, featuring a compact, lightweight design that ensures low energy consumption. It provides a stable arc with minimal spatter, resulting in high-quality welds and deep molten pools. Built-in safety mechanisms include self-protection against over-voltage and over-current conditions, making it a reliable choice for professional welding tasks.

Performance Features

Key Advantages

- Good arc-striking capability
- Workable against interference
- Stable arc with little spatter
- High welding quality
- Deep molten pool

Technical Specifications

Rated Current

250 A

Rated Current

Input Voltage

220V, 380V (Auto-switching)

Safety & Protection

Safety Protections

Over-voltage protection • Over-current protection • Thermal overload protection

Design & Build

Design Attributes

- Compact size
- Lightweight design
- Digital display
- Adjustable amperage control
