

Inverter Gas Shielded Welder

This is an inverter semi-automatic gas shielded welder. It features adjustable welding parameters and a user-friendly interface, making it suitable for a wide range of industrial welding tasks.

Product Overview

High-Performance Welding Solution

This inverter semi-automatic gas shielded welder is engineered for robust and precise industrial welding applications. Utilizing advanced inverter technology, it ensures a stable arc and superior energy efficiency during operation. The system features adjustable parameters to accommodate various materials and thicknesses, while the user-friendly interface allows for seamless monitoring and control.

Technical Specifications

Welding Technology

Inverter • Gas Shielded • Semi-Automatic

Model Identifier

FR-500A

Performance Metrics

Rated Current

500 A

Rated Current

Features

Capabilities

- Stable arc performance
- Adjustable welding parameters
- Energy-efficient power usage
- User-friendly control interface
