

Inverter MIG Welding Machine with Digital Display

This inverter MIG welding machine is designed for diverse welding tasks. It features digital displays for current and voltage, supporting 2T/4T modes as well as MMA and TIG welding.

Overview

Versatile Industrial Welding Solution

This inverter-based welding machine is designed for professional industrial applications, offering multi-process capabilities including MIG, TIG, and MMA welding. It features advanced IGBT inverter technology for efficient operation and includes a robust 4-roller wire feeder for consistent performance. With integrated digital displays for precise current and voltage control, it ensures high-quality results for demanding welding tasks.

Technical Specifications

Supported Welding Processes	MIG, TIG, MMA
Inverter Technology	IGBT Inverter Soft Switch
Wire Feeder System	4-Roller Feed Mechanism

Control & Interface

Operating Modes

2T • 4T

Adjustable Parameters

- Welding Current
- Voltage
- Burn Back

Digital Display	Yes
-----------------	-----

Safety & Design

Safety Protections

- Over Current Protection
- Over Heat Protection

Certifications

CE

Mobility

Mounted on wheeled cart
