

Inverter MIG/MAG/MMA Welding Machine

This inverter welder is designed for MIG/MAG, MMA, and TIG welding processes. It features digital displays for monitoring voltage and current, adjustable parameters, and a robust construction for industrial use.

Overview

Professional Inverter Welding Solution

This advanced inverter welding machine utilizes IGBT technology to deliver high working frequency, efficiency, and energy savings. Designed for versatility, it supports MIG/CO2/MMA welding processes within a single unit. With a robust tri-proof design and dual driving wire feeder, this machine ensures reliable performance even in challenging industrial environments.

Technical Specifications

Wire Feeder Performance

1.5 m/min
Min Feed Speed

15 m/min
Max Feed Speed

Supported Wire Diameters

- 1
- 1.2
- 1.6

Supported Processes

MIG, MAG, MMA, CO2

Performance & Safety

Duty Cycle Performance

Current	Duty Cycle
400	100%
500	60%

Protection Grade

IP2X

Safety Features

Under-voltage protection, Over-voltage protection, Over-current protection, Tri-proof design

Rated Input Voltage

18.3 V DC

Rated Input Current

3.5 A

Operational Features

Working Modes

2T, 4T

Welding Cable Cross-section

70 mm²
