

Inverter MMA Arc Welding Machine

This inverter MMA arc welding machine is compact, lightweight, and energy-saving. It features IGBT inverter technology to improve the reliability of the whole welding machine.

Product Overview

Professional Inverter MMA Welder

This compact and lightweight inverter MMA arc welding machine utilizes advanced high-frequency IGBT technology to deliver reliable, energy-saving performance. Designed for versatility, it is suitable for various applications including field work, internal decoration, and high-altitude tasks. The unit features automatic over-voltage and over-current protection, ensuring safety and durability even during voltage fluctuations.

Technical Specifications

High-performance internal architecture featuring 100% copper transformer and IGBT technology.

Internal Components

Component	Specification
Transformer	100% Copper
Capacitor	450V 470µF
Rectifier Bridge	31mm x 31mm x 10mm
Cooling	High-performance fan & Large radiator

Core Technology

IGBT Inverter, High Frequency, Energy Saving

Performance Features

Welding Capabilities

- Stable arc with minimal splash
- Deep penetration and strong weld strength
- Excellent arc-starting and arc force control
- Compatible with various basic welding rods
- Automatic compensation for voltage fluctuations

Safety Features

Over-voltage Protection • Over-current Protection • Thermal Overload Protection

Included Accessories

PRODUCT INFORMATION

ACCESSORIES

1.8M WELDING CABLE WITH 200A
ELECTRODE HOLDER
1.6M WELDING CABLE WITH 200A
EARTH CLAMP
MASK
HAMMER
BRUSH 1PCS EACH

Welcome to Laston WEB:www.lastonweld.com

Standard accessory kit including cables, electrode holder, earth clamp, mask, and cleaning tools.

Included Accessories

- 1.8m Welding cable with 200A electrode holder
- 1.6m Welding cable with 200A earth clamp
- Welding mask
- Chipping hammer
- Cleaning brush
