

Inverter Welding Machine with Digital Display

This is a powerful inverter welding machine designed for professional use. It features a digital display for precise control and monitoring of welding parameters.

Overview

Professional Inverter Welding Performance

The HM 315 is a high-performance inverter welding machine engineered for demanding industrial environments. Featuring precise digital controls, it allows welders to fine-tune parameters for a wide variety of professional applications. Its robust design ensures durability, while the intuitive front interface simplifies connection and monitoring for enhanced operational efficiency.

Technical Specifications

Construction

Robust Design • Industrial Grade

Connection Terminals

- Positive Terminal
- Negative Terminal

Model Identification

HM 315

Welding Technology

Inverter

Control Features

Digital Display, Fine-tuning Knobs
