

IP65 Metal Electrical Junction Box, 47mm Height

This customized 47mm height IP65 metal electrical junction box provides a secure and weatherproof enclosure. It is ideal for applications requiring durable electrical housing and protection against dust and water.

Product Overview

Professional Grade Metal Junction Box

This IP65-rated metal electrical junction box is engineered to provide a secure and weatherproof enclosure for critical electrical connections. With a compact 47mm height, it offers a robust solution for protecting components against dust and water ingress in demanding environments. Its durable construction ensures long-term reliability for various industrial and commercial electrical housing applications.
