

IP65 Rated Electrical Enclosures

These IP65 rated enclosures offer reliable protection for electrical components in harsh environments. Constructed from durable materials like stainless and powder-coated steel, they ensure safe operation in diverse applications.

Overview

Robust Protection for Industrial Components

These IP65 rated electrical enclosures are engineered to provide superior protection against dust, water ingress, and harsh environmental factors. Constructed from durable materials like stainless steel and powder-coated steel, they offer excellent corrosion resistance for long-term reliability. Designed for versatility, the range supports various configurations including viewing windows and control panels to suit diverse power distribution and control system installations.

Technical Specifications

Ingress Protection Rating

IP65

Suitable Applications

- Power Distribution
- Control Systems
- Industrial Installations
- Commercial Electrical setups

Construction Materials

Stainless Steel, Powder-coated Steel

Features

Key Configuration Options

- Viewing Windows
- Control Panels
- Flexible Mounting Options
