

IP65 Waterproof Digital Calipers

These digital calipers are designed for precise measurements in diverse environments. Their IP65 waterproof rating ensures resilience against dust and water splashes.

Product Overview

Professional Precision Measurement

These digital calipers are engineered for high-precision measurement tasks in demanding industrial environments. Featuring an IP65 waterproof rating, the device offers robust protection against dust ingress and water splashes, ensuring reliability in machining and engineering workshops. The clear digital interface allows for quick, accurate readings, making it an essential tool for quality control and precision manufacturing.
