Professional Grade IP68 Cable Glands

These high-quality waterproof cable glands are engineered for reliable cable entry in enclosure boxes, lighting fixtures, and industrial equipment. Featuring a durable nylon PA66 construction and EPDM rubber seals, they provide superior protection against environmental factors. The design includes a unique 'click' sound mechanism upon tightening, ensuring a secure, vibration-resistant hold with a wide clamping range.

Technical Specifications

Protection Rating

IP68

Operating Temperature Range

-40 °C

Min Temp

100 °C

Max Temp

Construction Materials

Nylon PA66, EPDM Rubber

Flammability Rating

UL 94V-2 (UL 94V-0 available upon request)

Compatibility & Options

Available Thread Types

- PG
- Metric
- G
- NPT

Chemical Resistance

- Salt water
- Weak acid
- Alcohol
- Oil
- Grease
- Common solvents

Standard Colors

Black, Grey, White, Red
