Product Overview

Precision Testing for Ingress Protection

This hand-held spray nozzle is engineered for verifying protection against spraying and splashing water according to IEC60529 standards. Designed for IPX3 and IPX4 waterproof testing, it features an integrated pressure gauge and adjustable flow control to ensure precise, repeatable test conditions. The robust construction includes a removable shield, allowing for versatile testing configurations for various electronic and electrical enclosures.

Technical Specifications

Pressure Gauge Range

1.6 bar

Max Pressure

Nozzle Configuration

Parameter	Value
Number of Holes	121
Hole Diameter	0.5 mm

Material

Brass

Compliance & Standards

Applicable Standards

IEC60529, IEC60598-1, IEC60335-1, IEC60745-1

Features

Device Capabilities

- Hand-held ergonomic design
- Integrated pressure gauge
- Adjustable flow control knob
- Removable shield feature
- IPX3 and IPX4 testing capability
