

Iridium-Platinum Alloy Spark Plug

This spark plug features an iridium center electrode and platinum ground electrode. It provides improved fuel efficiency and reduced emissions.

ADDITIONAL IMAGES

Product Overview

High-Performance Ignition Solution

This Iridium-Platinum alloy spark plug is engineered for optimal ignition and combustion efficiency in a wide range of engine applications. Featuring a fine-wire iridium center electrode and a platinum ground electrode, it offers enhanced durability, extended service life, and superior spark consistency. Designed to improve fuel efficiency and reduce emissions, this component ensures smooth engine operation even under demanding conditions.

Technical Specifications

Key Features

- Abrasion-resistant construction
- High-temperature stability
- Reduced voltage requirements
- Enhanced ignitability

Electrode Materials

Iridium Center Electrode, Platinum Ground Electrode

Performance Metrics

Performance Benefits

Improved Fuel Efficiency • Reduced Emissions • Extended Service Life • Quicker Starts

Compatibility & Standards

Compatibility Notes

Designed to serve as a replacement for various major spark plug models, ensuring versatility across different engine requirements.
