Product Overview

High-Performance Ignition Solutions

These iridium-platinum spark plugs are precision-engineered for motorcycle engines, offering superior durability and enhanced combustion efficiency. Designed to withstand high temperatures and pressures, they provide consistent ignition, improved fuel economy, and reduced emissions. The advanced construction ensures reliable performance and extended service life across a wide range of motorcycle models.

Technical Specifications

Available Electrode Designs

- Multi-ground electrode
- V-cut center-electrode
- V-groove center-electrode
- Surface-sparking

Cross-Reference Compatibility

NGK • DENSO • CHAMPION • BOSCH

Identified Part Models

- E6TC
- ATTC
- A7TC

Electrode Materials

Iridium, Platinum, Nickel, Copper

Service & Quality

Quality Grade

Customizable based on buyer requirements

Delivery Status

On-time delivery guaranteed
