

Iron LED Flashlight

This iron flashlight uses LED technology for energy-efficient and long-lasting illumination. It can be configured for one, two, or three batteries to adjust the size and lighting time.

Product Overview

Robust Iron LED Flashlight

This iron-constructed flashlight combines a classic, durable design with modern LED efficiency. It offers a versatile power configuration, allowing users to adjust the battery capacity between one, two, or three No. 1 batteries based on their specific size and lighting duration requirements. Built for reliability, the energy-saving LED bulb ensures long-lasting performance for professional or everyday use.
