

Iron LED Flashlight

This iron flashlight is designed for use with one, two, or three batteries, depending on the desired size and lighting time. It features an energy-saving and durable LED light bulb.

Product Overview

Durable Iron LED Illumination

This iron flashlight is engineered for durability and reliability in both indoor and outdoor environments. Featuring efficient LED technology, it provides a bright, energy-saving light source suitable for professional and general use. Its modular design allows users to adjust the battery configuration to balance size and lighting duration according to specific needs.

Technical Specifications

Battery Configuration

- 1 Battery (Compact)
- 2 Batteries (Standard)
- 3 Batteries (Extended)

Body Material

Iron

Light Source

LED

Battery Size

No. 1 Battery

Features

Key Features

Energy Saving, Durable Construction, Adjustable Length, LED Technology
