

Iron Roller Rice Mill

This iron roller rice mill is designed for efficient rice processing. It features a robust construction with a hopper, roller mechanism, and discharge chute.

Product Overview

Efficient Rice Processing Solution

The 6NF-9A Iron Roller Rice Mill is engineered for efficient and reliable rice processing, making it an ideal choice for small to medium-scale operations. Featuring a robust construction, this machine utilizes an iron roller mechanism to effectively hull and polish rice grains. Its belt-driven system ensures consistent performance and durability throughout the milling process.

Technical Details

Model Number	6NF-9A
Milling Type	Iron Roller
Drive System	Belt-driven

Operational Features

Key Components

- Feeding Hopper
- Iron Roller Mechanism
- Discharge Chute

Ideal Scale

Small-scale • Medium-scale
