

IS 16102 Compliant LED Bulb

This high-efficiency LED bulb is designed for general illumination purposes. It complies with IS 16102 (Part 1): 2012 standards, ensuring safety and performance.

Product Overview

High-Efficiency LED Lighting

This high-efficiency LED bulb is engineered for general illumination, offering a reliable lighting solution for various professional environments. It is fully compliant with IS 16102 (Part 1): 2012 standards, ensuring rigorous adherence to safety and performance benchmarks. Designed for ease of use, it features a standard screw base compatible with a wide range of existing fixtures, providing consistent, bright light output while minimizing energy consumption.

Compliance & Standards

Regulatory Standards	IS 16102 (Part 1): 2012

Technical Details

Base Type	Standard Screw Base
Primary Application	General Illumination

Performance Features

Key Performance Features

- High energy efficiency
- Consistent light output
- Low energy consumption
- Cost-effective operation
