

ISDE6.7 QSB6.7 Engine Cylinder Head, 6 Cylinder 24 Valve

This cylinder head is designed for ISDE6.7 and QSB6.7 engines, featuring a 6-cylinder configuration with 24 valves. It ensures optimal combustion and performance in heavy-duty machinery applications.

Product Overview

High-Performance Cylinder Head

This 6-cylinder, 24-valve cylinder head is precision-engineered for ISDE6.7 and QSB6.7 engines, ensuring optimal combustion and reliable performance in heavy-duty applications. Constructed from durable cast iron, it features optimized cooling passages and valve geometry to enhance heat dissipation and airflow. This component serves as a direct replacement part, designed to meet exacting tolerances for a seamless fit and improved engine efficiency.

Technical Specifications

Number of Cylinders	6
Number of Valves	24
Material	Casting iron
Compatible Engine Model	ISDE-6D

Compatibility & Identification

OEM Part Number	5282703
Additional Part Identifiers	3977221, 512Y031

Logistics & Support

Warranty	1 year
Place of Origin	Wuhan, Hubei, China
