

Island Range Hood with LED Lighting

This island hood is designed for efficient ventilation in modern kitchens. It features a digital display, multiple fan speed settings, and integrated LED lighting.

Overview

Modern Island Ventilation

This 90cm island range hood combines a sleek stainless steel and tempered glass design with powerful ventilation capabilities. Engineered for performance, it features a 190W motor delivering 750m³/h of airflow to effectively clear kitchen air. Integrated LED lighting and user-friendly electronic controls make it a practical and stylish centerpiece for any modern kitchen island layout.
