

ISO20 Plastic Tool Holder Clips for CNC Machines

These plastic clips are designed for ISO20 tool holders used in CNC machines with automatic tool changers. They securely hold the tool holder in place during high-speed machining operations.

Product Overview

ISO20 Tool Holder Clips

These ISO20 tool holder clips are engineered as high-quality replacement fingers for automatic tool changer (ATC) CNC machines. Designed for secure clamping, these clips are essential for maintaining precision and reliability during automated tool change operations. They are constructed from reinforced, high-grade POM plastic to ensure durability and long-lasting performance in demanding machining environments.

Technical Specifications

Material	Imported POM plastic (reinforced, anti-explosion)
Dynamic Balance Grade	G2.5
Maximum Speed	30000 rpm
Yaw Precision	0.005 mm

Applications

Compatible Tool Magazine Types

- Drum-type
- Carousel-type

Compatible Machine Types	CNC Router, CNC Milling Machine, Vertical Machining Center (VMC)
Processing Applications	Hole Drilling, Milling, Engraving
