

ISO/TS Certified Tapered Roller Bearing

This tapered roller bearing is designed for high load capacity and durability. It is manufactured with premium materials and adherence to ISO/TS standards.

Product Overview

Precision-Engineered Tapered Roller Bearing

This high-quality tapered roller bearing is designed for demanding industrial, automotive, and heavy-duty equipment applications. It features precision-engineered tapered rollers and raceways that ensure true rolling motion, effectively minimizing friction and maximizing load capacity. Manufactured to meet ISO/TS standards, this bearing offers reliable performance, extended service life, and high-speed operation.

Technical Specifications

Certifications

ISO/TS

Model Number

362230

Performance Features

Key Performance Features

- High load capacity
- High speed operation
- Low noise (low voice)
- Long working life

Service & Logistics

Service Options

OEM Service, Prompt delivery

Packaging

Neutral Packing or according to customer's requirement
