Product Overview

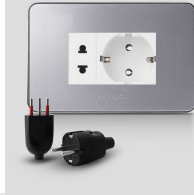

The H60/H80 series combines modern aesthetics with reliable electrical performance.

H60/H80 Series Wall Socket

The H60/H80 series offers a versatile and aesthetic solution for electrical power distribution. Featuring a sleek square design, these sockets are available in over 150 color combinations including injection, spray, and water transfer finishes to complement any interior. Engineered for durability, the series utilizes V2 class flame-retardant PC materials and phosphor copper components for reliable conductivity and long-lasting performance.

Technical Specifications

Socket:
10000 times plug in/out.

Engineered for longevity, supporting up to 10,000 plug-in/out cycles.

Rated Current

16 AX

Switch

10 A

Socket

Mechanical Life

Component	Cycles
Switch	40000
Outlets	10000

Rated Voltage

220V~250V

Physical Attributes

Many colors available:
injection color, spray color,
wooden color, electroplated
color, water transfer color, etc.

Available in diverse finishes including injection, spray, wood, and water transfer colors to suit any interior design.
