

Jab Saw for Drywall and Plasterboard

The jab saw is designed for cutting drywall, plasterboard, wood, and other soft materials. It features a sharp, hardened steel blade and an ergonomic handle.

Product Overview

Professional Jab Saw Overview

This jab saw is specifically engineered for precision cutting in drywall, plasterboard, and various soft materials. It features a hardened steel blade designed for efficient material penetration and clean cuts. The ergonomic handle design prioritizes user comfort, effectively reducing hand fatigue during extended use, making it an ideal tool for creating openings for electrical boxes, pipes, and fixtures.

Technical Specifications

Model Number	DT1402
Compatible Materials	Drywall, Plasterboard, Wood, Soft Materials

Design Features

Key Benefits

- Efficient cutting performance
- Reduced hand fatigue
- Precise cuts in tight spaces
- Ideal for fixture openings

Blade Material	Hardened Steel
Handle Type	Ergonomic
