

Japanese Style Flush Cut Hand Saw

The Japanese style flush cut hand saw is designed for precise and clean cuts in woodworking applications. Its thin, flexible blade allows for flush cutting without damaging surrounding surfaces.

Product Overview

Precision Flush Cutting

The Japanese style flush cut hand saw is engineered for high-precision woodworking tasks, featuring a thin, flexible blade that allows for seamless flush cutting without marring surrounding surfaces. Its design is optimized for detail work, trimming, and fine woodworking projects, ensuring clean results every time. Crafted from high-quality steel, this tool offers exceptional durability and sharpness for efficient performance across various soft materials.

Technical Specifications

Blade Characteristics

- Thin profile
- Flexible blade
- High-quality steel construction

Model Number	DT1818B
Compatible Materials	Wood, Plastic, Soft Materials

Usage & Ergonomics

Primary Applications

Flush Cutting • Trimming • Detail Work • Fine Woodworking

Ergonomic Features	Comfortable handle design suitable for extended use.
