

JC75 Skid Steer Loader

The JC75 skid steer loader is a versatile construction machine designed for various tasks. Its compact size and maneuverability make it ideal for working in confined spaces.

ADDITIONAL IMAGES

Overview

Compact design ensures high maneuverability in confined spaces for digging and loading tasks.

JC75 Skid Steer Loader

The JC75 is a versatile and compact construction machine engineered for high performance in construction, landscaping, and agricultural projects. It features a robust hydraulic system and high-torque engine, ensuring efficient material handling, excavation, and site preparation. Designed with operator productivity in mind, the unit includes an ergonomic cabin and user-friendly controls, while its compact footprint allows for superior maneuverability in confined spaces.

Key Features

The JC75 features a reinforced steel frame and a high-torque engine for demanding job site tasks.

Ergonomic operator cabin designed for enhanced visibility, comfort, and ease of use.

Primary Applications

Construction • Landscaping • Agriculture

Safety Systems

ROPS (Rollover Protection), FOPS (Falling Object Protection), Emergency Shut-off

Attachment System

Universal quick-attach system
