

Jet Pump for Water Transfer

This jet pump is designed for efficient water transfer in residential settings. It features a maximum flow rate of 55 liters per minute and a maximum head of 40 meters.

Product Overview

Robust Jet Pump for Versatile Water Transfer

This high-performance jet pump is engineered for reliable water transfer from wells, tanks, and various water sources. Featuring a durable cast iron body and corrosion-resistant brass impeller, it is designed to withstand demanding environments while maintaining efficient operation. The unit includes integrated thermal overload protection for enhanced safety and longevity, making it an ideal choice for both residential and commercial water management systems.

Construction & Materials

Pump Body Material	Cast Iron
Motor Body Material	Cast Aluminium
Impeller Material	Brass
Shaft Material	45# Steel (SS304 Optional)
Mechanical Seal Type	Ceramic/Graphite

Safety & Features

Safety Features	Thermal Overload Protection, Corrosion Resistant
-----------------	--

Application

Suitability

- Well water extraction
- Tank water transfer
- Residential water systems
- Commercial water systems
