

Jewelers Triplet Loupe Set

This precision triplet loupe set is designed for jewelers, gemologists, and hobbyists. It features multiple magnification options (10x, 15x, and 20x) to provide detailed views of gemstones, jewelry, and other small objects.

Product Overview

Professional Precision Inspection

This triplet loupe set is engineered for professionals in the jewelry and gemology industries who require high-clarity magnification. Featuring a versatile range of magnification levels, the set ensures distortion-free viewing for detailed inspection, appraisal, and intricate work. Its compact, foldable design guarantees portability, making it an essential tool for on-the-go assessments.
