

Jewelry Crafting Pliers with Non-Marring Jaws

These pliers are designed for jewelry making and delicate tasks. They feature smooth, non-marring jaws to prevent scratching soft metals and gemstones, while ergonomic handles ensure comfortable grip and precise control.

Product Overview

Professional Jewelry Crafting Pliers

These precision pliers are engineered specifically for jewelry making and delicate assembly tasks. Featuring specialized non-marring jaws, they protect soft metals and gemstones from scratches or damage during manipulation. The ergonomic design and spring-loaded mechanism provide the control and comfort required for professional crafting and wire work.

Design & Construction

Jaw Material	Nylon or Plastic (Non-marring)
Handle Design	Ergonomic
Action Mechanism	Spring-loaded

Applications

Key Benefits

- Prevents scratching on delicate surfaces
- Ensures smooth and consistent operation
- Provides precise control for intricate tasks
- Reduces hand fatigue during extended use

Primary Applications	Jewelry Making, Wire Shaping, Wire Bending, Component Assembly
