

JIS 10K Flanged Check Valve DN 40-150

This JIS 10K check valve prevents backflow in pipelines, ensuring unidirectional flow of fluids. It features flanged connections for secure installation and is suitable for a range of media including water, oil, and gas.

Overview

JIS 10K Flanged Check Valve

The JIS 10K Check Valve is a reliable industrial component designed to prevent backflow in pipelines, ensuring unidirectional flow of fluids. Featuring a robust construction with flanged connections, it is suitable for a wide range of media including water, oil, and gas. The valve is engineered to automatically close upon flow reversal, providing essential protection against backflow and pressure surges.

Technical Specifications

Standard	JIS 10K
Size Range (DN)	DN 40-150
Connection Type	Flanged

Features

Suitable Media

- Water
- Oil
- Gas

Key Features

Backflow Prevention, Automatic Closure, Flanged Connection, Manual Drain Valve
