

# JIS 10K Rising Stem Gate Valve DN 50-300

This JIS 10K Rising Stem Gate Valve controls fluid flow in pipelines. Constructed from durable materials, it offers resistance to corrosion and wear.

## Product Overview

### Industrial Gate Valve Solution

The JIS 10K Rising Stem Gate Valve is a robust and reliable component designed for demanding industrial applications. Featuring a rising stem design, it provides clear visual indication of whether the valve is in the open or closed position. This valve is engineered for durability and long service life, making it an ideal choice for controlling fluid flow in water, oil, gas, and various other industrial piping systems.

## Technical Specifications

Standard	JIS 10K
Nominal Diameter Range	DN 50 - DN 300
Valve Type	Rising Stem Gate Valve

## Features

Key Features	Rising Stem, JIS 10K Compliant, Corrosion Resistant, Industrial Grade
--------------	---

## Applications

### Compatible Fluids

- Water
- Oil
- Gas
- Industrial Fluids
