

# JIS High Mounting Pad 20k Ball Valve

This JIS high mounting pad ball valve is designed for industrial applications requiring reliable flow control. The valve features a 20k pressure rating, indicating its suitability for high-pressure systems.

## Product Overview

### High-Performance JIS Ball Valve

This JIS (Japanese Industrial Standards) high mounting pad ball valve is engineered for robust industrial applications requiring reliable flow control in high-pressure systems. Featuring a 20k pressure rating and constructed from durable materials like 316 stainless steel, it provides exceptional corrosion resistance and longevity. The integrated high mounting pad simplifies actuation, making it highly compatible with various automation solutions for demanding environments such as chemical processing and oil and gas.

## Technical Specifications

### Key Features

- High mounting pad for easy actuation
- JIS standard compliance
- High-pressure suitability
- Corrosion-resistant construction

### Valve Configuration

Parameter	Value
Standard	JIS
Pressure Rating	20K
Actuation Interface	ISO 5211
Connection	Flanged

  

Pressure Rating	20K
Mounting Standard	ISO 5211
Material Options	SCS13, SCS14, 316 Stainless Steel
Connection Type	Flanged
