

JIS Marine Bronze Gate Valve

This marine bronze gate valve is designed for marine applications requiring reliable flow control. The Class 150 rating indicates its pressure handling capability.

Product Overview

JIS Marine Bronze Gate Valve

This JIS Marine Bronze Gate Valve is engineered for demanding marine environments, providing reliable flow control for water, oil, and gas systems. Constructed from high-quality bronze materials, it offers superior corrosion resistance and durability essential for shipbuilding and offshore platforms. The valve features a robust gate mechanism designed for tight shutoff and smooth, consistent operation.

Technical Specifications

Material Composition

Component	Material
Body	BC6
Bonnet	BC6
Disc	BC6
Stem	C3771BD or BE
Gasket	F4
Handwheel	FC200

Pressure Class | Class 150

Standard Compliance | JIS
