

JIS Standard Check Valve DN 50-300

This JIS standard check valve prevents backflow in piping systems. It is available in DN 50-300 specifications.

Product Overview

JIS Standard Check Valve

This industrial check valve is engineered to prevent backflow in critical piping systems. Featuring a robust cast body and secure flanged connections, it utilizes a hinged disc mechanism for reliable, unidirectional flow control. Designed to minimize pressure drop, this valve is suitable for diverse applications including water, oil, and gas systems, ensuring consistent performance and compliance with JIS standards.

Technical Specifications

Visible Markings

- 20K10
- PH2
- 1499

Size Range	DN 50 - DN 300
Valve Type	Check Valve
Standards Compliance	JIS
