

# JIS WCB Flanged Gate Valve

This gate valve is suitable for use in oil fields, the chemical industry, coal mines, and environmental protection applications. It controls fluid flow via a handwheel-operated vertical gate.

## Product Overview

### JIS WCB Flanged Gate Valve

This JIS (Japanese Industrial Standards) gate valve features a robust WCB (Weldable Cast Carbon Steel) body designed for demanding industrial fluid control applications. It utilizes a reliable handwheel-operated mechanism for precise on/off flow management. With standard flange connections, this valve ensures a secure, leak-proof installation suitable for various compatible media.

## Technical Specifications

Body Material	WCB (Weldable Cast Carbon Steel)
Connection Type	Flanged
Standards Compliance	JIS, 10K, 20K
Operation	Handwheel
Primary Function	On/Off flow control
